

BinaryEdge - www.binaryedge.io - careers@binaryedge.io

BinaryEdge is a cybersecurity company that scans the entire internet and acquires real time threat data. Our clients use this data to secure their networks and find their exposure to hacker attacks.

Job Description

BinaryEdge focus their effort on acquiring, analyzing and classifying internet wide data by combining efforts in the areas of Cybersecurity, Data science and Machine learning. One of our main challenges is to visually reflect the huge amounts of data that we have in a way that is appealing and usable for our users.

Responsibilities will include:

- translation of the UI/UX design wireframes to actual code that will produce visual elements of the application
- Taking an active role on how the application looks as well as how it works
- Build reusable code and libraries for future use
- Research, learn and improve the BinaryEdge Platform

Benefits

- Ability to work independently and Remote - you are allowed to work from home, a local cafe or your favourite place
- Flexible hours - this is not a 9-5 job, you have some flexibility in the hours you work, we understand that inspiration comes at different times for different people
- Join a young, vibrant, exciting team that is working on the future of cybersecurity
- Every 6 months we get together to work on projects together like a hackathon

Skills And Qualifications

- ~2 years of work experience
- Proficient understanding of web markup, including HTML5, CSS3
- Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
- Proficient understanding of client-side scripting and JavaScript frameworks, i.e. AngularJS
- Basic understanding of Mocha, Selenium or similar for testing
- Good understanding of asynchronous request handling, partial page updates, and AJAX
- Understanding of cross-browser compatibility issues and ways to work around them
- Proficient understanding of code versioning using git and the github environment
- Understanding of SEO principles and ensuring that application will adhere to them

Nice to have

- Experience with Python,
- Experience with REST APIs
- Good English
